

# SHEET METAL INDUSTRIES 1989 INDEX

JANUARY TO DECEMBER VOLUME 66

## A

- Adding the laser option to punching machines 186
- Adhesive bonding of thin pre-coat 305
- Advanced aircraft manufacture at British Aerospace Manchester 512
- Advanced cam technology ensures maximum machine tool utilisation 228
- Advanced sheet metal technology for the aerospace industry 507
- Ahead of the field - and ready for Europe - a profile of Elmsteel 547
- Air plasma cutting takes over from punching tools 500
- Applications for laser processing of sheet metal 182
- Applying robotics to pressbraking 642
- Arched sections from thin roll-formed Al sheet 238
- Automatic nesting enhances productivity 231

## B

- Building the Ford Fiesta of the 1990s 120

## C

- Cad/Cam for quality profile service 227
- Calculator programs for sheet metal developments 126, 197, 246, 285, 324, 425, 470, 525, 599, 646
- Cam aids tool design and manufacture 11
- Captive fasteners - re-usability in sheet metal 590
- CNC punch presses 392
- CNC punch press survey 337
- Coil coating investment for the future 484
- Coil coating order from the Netherlands 131
- Cold mill officially commissioned in Baoshan steelworks 142
- Coloured ducts catch the eye 417
- Computer aided design and manufacture of sheet metal parts 445
- Computer programme for wall ironing of tapered cylinders 217
- Computers and roll forming tool design 360
- COSHH and the Paint Shop the alternative to costly investment 658
- Customised pre-finished profiles 364

## D

- Dedicated shearing centre for small blanks 21
- Deep drawing advances reduce press operations 224
- Developing coatings for the automotive industry 139

## E

- ECCA annual meeting shows mature and healthy industry 482
- ECCA automotive task group promotes pre-coated metal for the automotive industry 296
- Economical fabrication with large panel transfer presses 163
- Electric feeds 625
- EMO exhibition preview 400
- Engineering experience evolving from tradition 641

## F

- Fineblanking alternative 16
- Flexible forming for automotive and aerospace applications 515
- Flexible pressworking cells for the small to medium sized company 49
- Flexible programming of the tube saw 179
- Ford Fiesta assembly 522
- From multiple slide machines to three dimensional processing centres 103

## G

- GDR developments in flexible automation 331

## H

- Health and safety: the main current issues 275
- High speed presswork requires advanced strip feeding 456
- High speed production of blanks 469

## I

- Improved accuracy for profile cut-off 363
- Improved CO<sub>2</sub> laser cutting performance by reflective phase retarders 190
- Improved efficiencies on high speed punch presses 464
- Improved guillotine operation 25
- Industrial fastenings - entering a new age 587
- Instant grid pattern (IGP) for strain measurement in the press shop 62
- Investment for total duct working capability 420
- Inward mission success 564
- Itae syncro-performance criterion for metal forming presses 32

## K

- Krupp canmaking technology at Carnaud 20

## L

- Laser cuts car components to size 188
- 5kW Laser for Welding Institute 194
- Lasers in sheet metal fabrication 192
- Long life approach to precision rolling 115
- Looking to a flexible future—a profile of Vibab 388

## M

- Manually operated cnc tube bender 174
- Mechanical or hydraulic press die change in seconds 165
- Meeting industry's demands on roller levelling machines 117
- Meeting those pressing needs 223
- Midlands investment in coil process 566
- Modern control of deep drawing presses 221
- Moving with the market—a profile of Edwards Pearson 244
- Multiple slide machines for JIT manufacture 109

## N

- New giant in the power press world 332

- Newtown pioneers of high speed metal forming 635

## O

- Optimising resources gives low budget automation 226
- Orbital tube and pipe welding 551
- ORI introduces sheet straightener/feed combination into UK 250

## P

- Part programming system enhances prototype production 30
- Photoelectric guarding of machinery and processes 277
- Polarcold presses ahead 520
- Polifilm kicks off at new site 148
- Precision metalforming 396
- Press controls simplify operation 249
- Press feeding—automatic, transfer & progression—an introduction 622

## Q

- Quality and flexibility keep Mefa in the fast lane 328

## R

- Record participation in ECCA Annual Congress 146
- Reliable slug detection 463
- Repair of fractured castings 167
- Retrofit press tool clamping systems 68
- Ring rolling into the nineties 237
- Rollforming today 358
- Roll levelling for welded fabrications 112

## S

- Safeguarding of robots and associated machinery 279
- Safe and sensible monitoring for economical operation 630
- Sowing the seeds of future success 576
- Section bending of aluminium extruded sections 240
- Serving the French auto industry and beyond 326
- Sheet punching in prestress 26
- Single market threatens supremacy of the UK ductwork standard 419
- Sophisticated components call for expertise 12
- Spinning controls—a review and assessment 52
- Spinning shrugs off its craft image 56
- Splat! the story unfolds 453
- Standing tall in chimney fabrication—a profile of Service Welding Ltd 423
- Steelstock invests in coil technology to increase customer satisfaction 571
- Superplastic forming for the aerospace industry 78
- Swiss sister's big baby 455

## T

- Targeting the appliance market 300
- Technological advances in duct work production 416
- Total quality management keeps pre-coat ahead of market 308
- Tube makers benefit from computerised coil slitting 539

# SHEET METAL INDUSTRIES 1989 INDEX

JANUARY TO DECEMBER VOLUME 66

## A

## PLATARG TRANSFER PRESSES

### REDUCE COSTS!

- **LABOUR:** one transfer press replaces several conventional presses.
- **TOOLING:** economic due to simple single stage tooling, individual stages easily adjusted/removed.
- **MATERIAL SAVING:** parts are carried in transfer fingers and not in overwide strip as in progression tooling.
- **HANDLING:** no interstage inspection, storage or annealing.
- **OUTPUT:** consistent high production rates with improved efficiency.

**"TOOLING ALSO SUPPLIED IF REQUIRED"** May we send you our detailed brochure?

PLATARG Eng. Ltd., Trumpers Way,  
Hanwell, London W.7 2QA, ENGLAND  
Tel: 01-574-1022. Telex: 8812977  
Fax: 01-571 6106

Typical parts produced complete on transfer presses
